

4202T

# Altus — Truck Brake Tester RT9241 —

Multiple configurations of floor units, peripherals and accessories are possible to create an **Altus® PC based test lane** for heavy vehicles exactly adapted to the needs and possibilities in your workshop. The Altus® truck roller brake tester is model **RT9241**. The Altus® console is the freestanding model **4202T**.

RT9241

Easy installation, setup, service and calibration.

## Including:

- rear rollers raised
- motor brake
- star-delta switching
- reversible rollers for 4x4

The **RT9241** standard has the rear rollers raised and each pit is equipped with its own integrated electronic box including **star-delta switching**. A separate relay box is not required. Also standard are the electronic motor brake, automatic slip detection and emergency stop button.

Even with the heaviest loaded axle, it causes no problems to drive out of the rollers. The chassis is hot dip zinc and all moving components are equipped with quality bearings. This reduces the maintenance on the brake tester to a minimum.

## Options

- RF remote control hand set.
- Roller cover plates.
- Weighing system.
- Load simulator (10,000 kg).
- Wireless air pressure set.
- Air pressure transducer (cable connected).
- TSS1000 sideslip meter (25m/km toe in/toe out).
- TX analogue/digital parallel display.

## Specifications

		RT9241
Measuring range	kN	40
Axle load	ton	16
Roller speed	km/h	2,6
Roller dimensions	mm	250 x 1000
Motors	kW	2 x 15
Dimensions (each side)	cm	132 x 74 x 69
Chassis finish		Hot dip zinc

Specifications of floor modules, console components and options, available upon request. Technical specifications are subject to changes without notice.

## 4202T Freestanding PC console

- PC with Windows® based application, keyboard, mouse, widescreen LCD.
